SOGLIE GUTMANN
GUTMANN THRESHOLDS

G U T M

1 A N N

Le soglie GUTMANN soddisfano i requisiti predisposti dalla normativa DIN 18040 1 + 2, relativa alle costruzioni senza barriere architettoniche. Resistono all'acqua per livelli superiori a 1350 Pa, certificato IFT, con una guarnizione in gomma cellulare nella sezione della soglia.

GUTMANN thresholds are suitable for barrier-free building by DIN 18040 part 1 + 2.
Fulfilled highest watertightness up to 1350 Pa, IFT-certicated, with a cellular rubber gasket in the section of the threshold.

CARATTERISTICHE

FEATURES

Riduzione del punto di rugiada o della formazione della condensa attraverso un'ottima gestione isotermica.
Punti di fissaggio nascosti nella finestra con l'applicazione di una piattina di supporto.
Controlavorazione predisposta attraverso l'applicazione di tappi di testa.
Elementi di protezione intercambiabili e disponibili in alluminio e in plastica.
Plastiche utilizzate prive di PVC.

Reduction of dew point performance or condensate formation via an optimal isothermal run.
Concealed screwing on the frame via application of the threshold support.
Counter-milling dispensed by using the filler pieces.
Exchangeable step protection optional plastic or aluminium.
Used plastic is PVC free.

PERCHÈ IN PVC?

Costo contenuto e versatilità d'impiego rendono il PVC uno dei materiali plastici più diffusi. Le mescole hanno proprietà chimico-fisiche diversificate e permettono di ottenere coestrusioni di durezza e colori diversi. Inoltre, offrono la possibilità di estrarre geometrie complesse difficilmente realizzabili con altri materiali plastici. Ideali per uso interno, le guarnizioni in PVC sono altamente performative in termini di resilienza, elasticità e resistenza all'invecchiamento.

Low price and versatility in use make PVC one of the most common plastic materials. Blends have different chemical-physical features and allow to produce coextrusion of different colours and hardness.

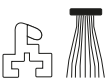

Moreover, PVC offers the chance to extrude complex geometries not easy to be produced with other plastic materials. Perfect for interiors, PVC gaskets are highly performative in terms of resilience, elasticity and resistance to ageing.

ATTENZIONE: tutte le guarnizioni porte in TPV sono disponibili fino a esaurimento scorte. Come indicato, alcune guarnizioni porte vengono sostituite dalla variante in PVC.

PLEASE NOTE that all gaskets for doors made of TPV are available while supplies last. As specified, some gaskets for doors will be substituted with PVC version.
